CalTrak® Asset Management System

Transcat's CalTrak Online is the Cornerstone to any Comprehensive Asset Management System.

Utilized by every technician on every job – at our facilities or your site – for the documentation, tracking and control of your tools.

Access Your Instrument Status and Documentation Anytime, Anywhere!

CalTrak Online Asset Management System makes it easy for you to check on the status or location of your equipment, whether a hydraulic torque wrench or a clamp meter. Your data sheets, certificates and asset listings are always available for viewing or downloading – instantly, 24/7. You can even track the progress of your equipment currently in the lab in any of our disciplines like torque or electrical. Calibration intervals and maintenance schedules are set at intervals you select to ensure your tools and equipment are kept current. CalTrak will automatically issue a reminder when your equipment is due for recalibration.

Be Confident That Your Records Are Safe and Secure!

CalTrak Online provides secure storage of your valuable calibration certifications. It is a safe, secure, off-site archive, eliminating concerns about your records being lost or destroyed.

Maximize Compliance with Quality Standards!

CalTrak Online offers you the peace of mind that all of your data is certified to comply with the strictest quality standards. All of our data sheets are controlled, standardized documents. Transcription errors are eliminated, since every report and certificate is produced from a unified database. CalTrak has full reverse traceability. By using CalTrak Online for certificate and data storage, your quality program will pass audits with flying colors!

Take a Test Drive!

Log on to the CalTrak Online demo database at caltrakonline.com and begin the tour to find out how to retrieve reports, certificates and data records. Discover what other leaders in the Wind Energy Industry have about the CalTrak Online Asset Management System:

- Easy to use
- Fast document retrieval
- Secure reproduction of certified, accredited documents
- On-demand document retrieval
