## TRANSCAT

This broad Ashcroft ${ }^{\boxplus}$ switch series is ideal for use in virtually all process and industrial applications.

- Explosion-proof NEMA 7/9, IP66 enclosure (explosion-proof enclosure Class I, Div. 1 \& 2, Groups B, C, \& D and Class II, Div. 1 \& 2, Groups E, F \& G)
- Choice of switch elements for all applications, including hermetically sealed
- Wide choice of wetted materials, including all-welded Monel or stainless steel
- Fixed or limited adjustable deadband
- UL listed

## 1 - ENCLOSURE

B7 - Pressure switch, type 700, explosion-proof enclosure meets Div. 1 \& 2, NEMA 7/9, IP66 requirements
D7-Differential pressure switch, type 700, explosion-proof enclosure meets Div. $1 \& 2$, NEMA 7/9, IP66 requirements

- Various actuators available
- Belleville actuator ${ }^{(8)}$
- Readily available
- Standard pressure connection materials:

Pressure psi ranges - 316L SS

Differential psid ranges

- Nickel plated brass ${ }^{(9)}$

Pressure and differential inches of water ranges

- Epoxy coated carbon steel
- ATEX models available ${ }^{(8)}$
- CSA models available( ${ }^{(8)}$
- FM models available ${ }^{(8)}$

| 3 - ACTUATOR SEAL ${ }^{(7)}$ |  |  |  |  |  |

(See pages 229-230)

## 5 - STANDARD PRESSURE RANGES

(See page 226)

## NOTES:

1. Standard switch.
2. Dual switches are 2 SPDT snap-action switches not independently adjustable.
3. Estimated dc rating, 2.5A, 28 Vdc (not UL listed).
4. Estimated dc rating, .4A, 120 Vdc (not UL listed).
5. Available on pressure only.
6. Ambient operating temperature limits -20 to $150^{\circ} \mathrm{F}$, all styles. Setpoint shift of $\pm 1 \%$ of range per $50^{\circ} \mathrm{F}$ is normal. Switch calibrated at $70^{\circ} \mathrm{F}$ reference.
7. Items are wetted by process fluid.
8. Refer to Option Table.
9. Order Option XUD, stainless steel process connection.
10. On differential switches, stainless steel is
available in 15, 30, 60 and 90 psid ranges only.
Includes Teflon 0-ring and 316 SS connection.

## ATEX APPROVAL FOR HAZARDOUS LOCATIONS

ATEX is a European designation that deals with standards for equipment and protective systems intended for use in potentially explosive atmospheres. This approval is required for switches intended for use in hazardous locations, especially important to OEMs who export to Europe and contractors specifying or purchasing products for European applications. XCN option adds special features to Ashcroft 700-Series switch enclosures that meet the requirements for the highest levels of security and danger, such as:

- Special locking device requiring an Allen wrench to remove cover
- Special vents that blow out should the diaphragm rupture,
thus preventing pressure build-up in the enclosure
- Special conduit plug requiring an Allen wrench for removal
- Available on pressure, temperature and differential
pressure models
- Meets Explosion Class EEx d IIC T6
