The Monarch PHASAR-TACH combines the accuracy and safety of a non-contact optical Tachometer with the convenience and ease of operation of a pistol grip instrument. Simply aim the Tachometer at a reflective target on the rotating object, squeeze the trigger, and read the RPM. The PHASAR-TACH "R" version has both internal optics and the ability to be used with a Remote Optical Sensor. Either version of the PHASAR-TACH may be handheld or mounted utilizing the 1/4 - 20 threaded bushing in the base of the handle.

- Convenient pistol grip design
- Safe non-contact operation to three feet & 45 degrees from target
- Autoranging 50 to 20,000 RPM
- Accuracy & resolution ± 1 RPM
- 4 1/2 digit LED or LCD display
- Available with Remote Sensor
- Low battery & on-target indicators
- Last measurement memory
