B&K Precision offers a wide variety of current clamps for safe non-invasive current measurement. Measure 10mA to 2000A with these reliable, rugged instruments. All of B&K Precision clamps are much more than a current clamp offering the ability to measure, voltage resistance, capacitance and even frequency. Additionally, special features allow for the recording of minimum and maximum values, peak values, test diodes and for continuity. Any one of these products can be a total measurement solution.
