When trading up to the **DPI620G Series** you will be getting a next generation Calibrator with up to 25% off the list price, with these best in class benefits:

DPI620G Series Modularity

Interchangeable elements offer system expansion, delivering a highly portable calibration system suitable for all budgets.

4Sight2 software

Automate procedures, document results, improve data quality and spend less time on your calibrations.

DPI620G Series Multi-functionality

Replaces several conventional test instruments & HART communicator with one device, reducing your burden for the management, service and calibration of assets.

Our Elite Range

DPI620G Series is a modular system offering state-of-the-art multifunction communication and calibration

Easy to use

3 Tools in 1: calibrator, test meter and Hart/FF communicator

Best in class accuracy

For pressure, electrical, temperature and frequency

Automates procedures

Documents results and integrates with calibration software such as 4Sight2

Advanced Modular Calibration System

The Elite range

High Accuracy Pressure Calibrators

High Performance Pressure Calibration

The Expert range

Single and Multifunction Calibrators

Hand Pumps

Gauges

The Essential range

Expert range

Introduces higher accuracy with increased functionality

Essential range

Provides rugged, accurate and easy-to-use test and calibration tools

*Offer available until 31st October 2019
