Humidity Range (EGNX, EGNL)

The blue area shows the standard humidity range. The red area indicates the optional low-humidity range, and the green the optional ultra-low humidity range.

NOTE:

Please submit a performance evaluation request (see page 4) to ensure selection of the correct model for your test requirement.

Site requirements also include a drain for condensate water from the chamber, and ample spacing for service and proper air cooling.

These specifications are for reference only. Detailed and current specifications can be obtained from your local sales representative.
