JOFRA®
calibration

» **High accuracy**
Down to ±0.06°C (±0.11°F) using the external reference sensor. 4-wire True-Ohm-Measurement technology applied

» **Excellent stability 0.01°C**

» **Wide temperature range**
PTC-155 from -25 to 155°C (-22 to 311°F)
PTC-350 from 33 to 350°C (91 to 662°F)
PTC-660 from 33 to 660°C (91 to 1220°F)

» **Improved temperature homogeneity**
Unique active dual-zone block ensures good temperature homogeneity in the calibration zone

» **Intelligent reference sensors**
JOFRA reference sensors are supplied with intelligent plugs, containing calibration data (coefficients) of the reference sensor. A truly plug'n'play calibration system

» **USB communication**
All PTC calibrators communicate via an easy-to-use USB port

» **Time-saving**
High speed heating and cooling times. 350°C in only 7 minutes

» **Work order functionality**
Upload advanced calibration routines to your PTC for troublefree and automatic on-site calibrations

ISO 9001 Manufacturer

Intuitive and fast calibration!

Professional Temperature Calibrator
PTC-155, PTC-350 & PTC-660

AMETEK continues to develop new techniques to improve performance, accuracy, convenience and functionality of the well-known JOFRA calibration products. By doing so, we maintain our position as the leading worldwide manufacturers of temperature dry-block calibrators.

The new PTC calibrator comes in three different models: A, B and C
• PTC-A professional temperature calibrator
• PTC-B professional temperature calibrator with input for reference sensor and sensors-under-test
• PTC-C professional temperature calibrator with input for reference sensor

The PTC offers many of the weel-known JOFRA features, such as:
• Easy-to-read color VGA display with perfect overview of the actual calibration status
• Intelligent recalibration information, IRI
• Intuitive, fast and user-friendly navigation
• Lightweight and easy to carry around
• Functional carrying case
• Multi-hole insert kits covering all the most used sensor sizes
• High profile design and the well-known long lasting JOFRA quality

AMETEK®
TEST & CALIBRATION INSTRUMENTS

Unique temperature performance

The PTC series of calibrators provides precision temperature calibration of sensors, whatever the type or format. This is accomplished through an innovative active dual-zone heating technology.

The JOFRA PTC-series features our well-known active dual-zone heating technology. Each heating zone is independently controlled for precision temperature calibration. The homogeneity in the lower part is close to that of a laboratory liquid bath. The lower zone ensures optimum heat dissipation throughout the entire calibration zone. The upper zone compensates for heat loss from the sensor-under-test and from the open top. This design also eliminates the need for extra insulation of sensors-under-test and makes it possible to calibrate liquid-filled and other mechanical sensors.

USB connector for communication

The new USB connection provides fast and easy access to all laptops without the need of RS-232 to USB converters. Future-proof through e.g. a flash capability for easy firmware upgrades as well as already integrated LAN communication and USB host connectors for future use.

NEW!

Intelligent recalibration information, IRI

In order to comply with ISO, SOP's and FDA it is imperative that the calibration equipment never exceeds the expiry date of the calibration certificate. The PTC calibrators are constantly checking calibration dates on the calibrator as well as for the connected STS sensors. If the calibration period has expired, a warning will appear in the display. This feature prevents costly consequence evaluation.

Intelligent reference sensors

The JOFRA STS-150 intelligent reference sensors contain individual calibration data regarding the sensor. This means that the time-consuming coefficient downloading sequence with risk of errors is no longer necessary and that the user can change the reference sensor and be up and running immediately.

With the intelligent sensors, AMETEK has eliminated a source of error and the system is now giving a fail-safe plug'n'play calibration system.

Unique reference sensors

The new STS-150 reference sensors are angled at 90˚ and are only slightly higher than the top of the PTC calibrator.

The unique design makes it possible to calibrate threaded sensors and sensors with connection heads without any problems

Only 8.2 kg

Easy to carry

Particularly users that frequently perform on-site calibrations will appreciate the focus on minimizing the weight of the PTC calibrator.

We have thoroughly included the weight issue in our design and have developed new design techniques that have made the PTC calibrator lightweight and easy to carry around without compromising its quality, durability and functionality.

Fast temperature calibration

350˚C in 7 min.

Time is money! The new PTC calibrators have an increased heating and cooling speed. The PTC-350 go's from 33°C up to 350°C in just 7 minutes. The implication is savings in both production downtime and general calibration costs.

New multi-hole insert kits

Two special multi-hole insert kits have been developed to comply with calibration of almost any sensor diameter without having to buy numerous inserts.

The first kit is a metric insert kit consisting of only four inserts covering all diameters from 3 to 12 mm. The other is an imperial insert kit consisting of only three inserts covering six different sizes from 1/8" to 1/2". All inserts have, beside the holes for the Sensor under test, a 4 mm STS reference sensor hole. With this new insert kit in the carrying case, the user is now able to calibrate all commonly known sensor sizes.

Wide temperature range

The PTC-series can perform calibration over a very wide temperature range starting from -25°C and up to 660°C (-13 to 1220°F). This makes it possible to perform calibration jobs over a range of 685°C (1233°F) with only two calibrators.

Intuitive and fast navigation!

Easy-to-read
color display and user-friendly navigation

The 5.7" full color VGA display is very easy to read. The main temperatures, like SET, READ, TRUE and Sut (Sensor under test), are always displayed at all stages of the programming or calibration procedure.

The navigation is menu-driven and very logical to use and the display shows any important information needed for the current function in use. The communication windows pop up and are followed by discrete sound messages.

The back-lit display can easily be read in all light conditions.

The large display contains more detailed information, such as:

- Stability status
- Real time clock
- Serial number of reference sensor
- Sensor-under-test status

All-in-one carrying case

The specially designed carrying case makes it possible to store the STS reference sensors in an optimum physical protection. There is room for inserts and insulation plugs to cover all dimensions and a compartment for wires, manuals, certificates, plugs, insert tools etc.

Integrated support rod

The integrated support rod is part of the reduced weight philosophy. It is lightweight and very easy to mount on the PTC. Two fixing holes are integrated in the calibrator where the support rods can be mounted.
Integrated!

MVI - Secure temperature stability

MVI stands for ''Mains power Variance Immunity''. Unstable mains power is a major contributor to on-site calibration inaccuracies. Traditional temperature calibrators often become unstable in production environments where large electrical motors, heating elements, and other devices are periodically cycled on or off. The cycling of supply power can cause the temperature regulator to perform inconsistently, leading to both inaccurate readings and unstable temperatures.

The JOFRA PTC calibrators all employ the MVI functionality, thus avoiding such stability problems. For the PTC-155 the MVI functionality is obtained by running the calibrator on stabilized DC voltage.

Highest accuracy

The PTC series B and C models are supplied with a built-in reference measuring circuit to be used with an external reference sensor. This feature allows the instrument to perform calibrations on-site, while maintaining a high accuracy.

A special 90° angled external reference sensor is designed to accommodate calibration of sensors with a transmitter head, top connector or similar arrangement. The user can decide whether to read the built-in reference sensor or the more accurate angled reference sensor from the large, easy-to-read display. The external and the internal sensor readings are independent of one another.

SET-Follows-TRUE

Available on B and C models only, the "SET-Follows-TRUE" makes the instrument tune in until the temperature reading of the external reference "TRUE" meets the desired "SET" temperature. This feature is important when it is critical that the temperature of the calibration zone matches the desired temperature when measured with accurate external reference sensors.

Reading of sensor-under-test

The PTC model B is equipped with a built-in accurate measuring circuit for sensor-under-test (input), which enables measurement of virtually any type of temperature sensors including: resistance thermometers (RTD), thermocouples (TC), transmitters, milliamps (mA) and thermostats.

The PTC calibrators can be user-programmed from the keyboard for fully automatic sensor calibrations. Once the unit is programmed, the instrument is self-operating and performs the configured calibration routine. All calibration data are stored and can be read in the display.

Switch test

On the B model you can perform a thermoswitch test and find "Open", "Closed" and the hysteresis (deadband) automatically. The instrument retains the last twenty test results.

Auto-stepping

Up to 20 different temperature steps may be programmed including the hold time for each step. Upon completion of an auto step routine, the user can easily read the results for the sensor-under-test on the PTC display. Results from twenty auto-step calibrations are stored.

The "Set temperature" feature allows the user to set the exact desired temperature with a resolution of 0.01°.

Enhanced stability

A stability indicator shows when the PTC calibrator has reached the desired temperature and is stable. The user may change the stability criteria for the external reference and the sensor-under-test quickly and simply. The stability criterion is the user's security of a correct calibration. A count-down timer is displayed next to the temperature read-out.

Instrument setups

The PTC series allows the user to store up to ten (10) complete instrument setups. You can store all sorts of information including temperature units, stability criteria, use of external reference sensors, resolutions, sensors-under-test (Sut), conversions to temperature, display contrasts, etc. The setup may be recalled at any time.

Maximum and minimum temperature

From the setup menu, the user can select the maximum and minimum temperature limit for the calibrator. This function prevents damage to the sensor-under-test caused by excessive temperatures and it helps reduce sensor drift from exposure to high temperatures. This feature can be locked with an access code.

Free download www.jofra.com

JOFRACAL calibration software

JOFRACAL is a highly versatile calibration software that is supplied together with the PTC calibrator. The software ensures easy calibration of all kind of temperature sensors, such as RTD´s, thermocouples, transmitters and thermoswithes. Furthermore, it can be used for pressure calibration i.e. pressure gauges and pressure switches.

This allows the PTC calibrator to:
- Operate as a stand-alone instrument, using advanced calibration routines without the assistance of a personal computer on site. The work order functionality
- Prevent unauthorized changes to a calibration routine. Personnel who are not authorized to alter a calibration routine cannot do so

Once all calibrations are completed, the data may be uploaded to the JOFRACAL for printing of certificates. The data collected may be stored on the personal computer for later recall or analysis.

JOFRACAL offers extended output formats of the captured calibration data such as PDF file format and ASCII/semicolon separated text format for further processing and calculation of data in spreadsheets and word processors.

JOFRACAL is compatible with all JOFRA temperature, pressure and signal calibrator instruments.

JOFRACAL may also be used for manual calibrations, as it can be set up to accept manual entry of calibration data together with other brand dry-block heat sources, liquid baths or ice points.

Calibration of up to 24 sensors
with JOFRA ASM

Using the JOFRA PTC series together with the ASM, Advanced Signal Multi-scanner, offers a great time-saving automatic solution to calibrate multiple temperature sensors at the same time. The ASM series is an eight channel scanner controlled by the JOFRACAL software on a PC. Up to 3 ASM units can be stacked to calibrate up to 24 sensors at a time. It can handle signals from 2-, 3- and 4 wire RTD's, thermocouples, transmitters, temperature switches and voltage.

Hardware requirements

- INTEL™ 486 processor
- (PENTIUM™ 800 MHz recommended)
- 32 MB RAM (64 MB recommended)
- 80 MB free disk space on hard disk prior to installation
- Standard VGA (800 x 600, 16 colors) compatible screen
- (1024 x 786, 256 colors recommended)

Optional PTC firmware pakage

Optional PTC firmware package

Optional feature for B model only. See Option U1 in ordering code.

The PTC calibrator can be supplied with additional functionality.

1. Engineering units in display
2. Work order functionality
3. Additional sensor under test input types*

*Pt10(90)385, Pt50(90)385, Pt200(90)385, Pt500(90)385, Pt50(90)391, M50(90)428, M100(90)428, Pt100 Mill and YSI-400

Upon buying the User Interface functionality, U1, the following three capabilities are enabled.

Documenting temperature calibrator

The PTC calibrator can store calibration procedures and may be taken out to the process site without bringing a personal computer.

This allows the PTC calibrator to:

- Operate as a stand-alone instrument, using advanced calibration routines without the assistance of a personal computer on site. The work order functionality

- Prevent unauthorized changes to a calibration routine. Personnel who are not authorized to alter a calibration routine cannot do so

Once all calibrations are completed, the data may be uploaded to the JOFRACAL for printing of certificates. The data collected may be stored on the personal computer for later recall or analysis.

As found/As left

On the B model you can, when running a calibration initiated from a work order, select the calibration as an As Found or an As Left calibration.
Calibration of indication devices

When calibrating the B model an indicating device in the work order mode, users may key in the results during or after the test. Using the "Calibration info" function, the user may view the complete calibration task, including the "Scenario" before the calibration takes place.

Unique temperature performance

The PTC series of calibrators provides precision temperature calibration of sensors, whatever the type or format. This is accomplished through an innovative active dual-zone heating technology.

The JOFRA PTC-series features our well-known active dual-zone heating technology. Each heating zone is independently controlled for precision temperature calibration. Model A, B and C:
- PTC dry-block calibrator (user specified)
- Mains power cable (user specified)
- Traceable certificate
- Tool for insertion tubes
- Heat shield - PTC-350 and PTC-660
- JOFRACAL
- USB cable
- Set of rubber cones for insulation plugs - PTC-155
- Manual

Model B instruments contain the following extra items:
- Test cables (2 x red, 2 x black)
- Traceable certificate - for reference sensor input
- Traceable certificate - for sensor-under-test input

Model C instruments contain the following extra items:
- Traceable certificate - for reference sensor input

ACCESSORIES

125066	Extra fixture for sensor grip
125067	Extra sensor grip
120516	Thermocouple Male Plug - Type J - Black
120517	Thermocouple Male Plug - Type K - Yellow
120514	Thermocouple Male Plug - Type N - Orange
120515	Thermocouple Male Plug - Type T - Blue
120518	Thermocouple Male Plug - Type R / S - Green
120519	Thermocouple Male Plug - Type Cu-Cu - White

OPTIONS

Carrying Case - Option CX

Our new developed protective carrying case gives excellent protection to the PTC calibrator and holds room for inserts, cables etc.

Trolley Carrying Case - Option CT

With our special designed carrying case it is now possible to store reference sensors in the case with an optimum physical protection. With improved integrated trolley system for easy and safe transportation.

Support rod set - Option SR

Support rod for sensors to be mounted on all JOFRA PTC calibrators. Holds the sensor under test in its position, while calibrating. Includes 2 sensor grips and 2 fixtures for sensor gribs.

FUNCTIONAL COMPARISON

Model A   Model B   Model C

	Model A	Model B	Model C
Dual-zone heating/cooling block	•	•	•
MVI - Mains Variance Immunity (or similar)	•	•	•
Stability indicator	•	•	•
Automatic step function	•	•	•
USB communication	•	•	•
Display resolution 0.01˚C	•	•	•
Programmable max. temperature	•	•	•
External precision reference sensor input		•	•
"SET" follows "TRUE"		•	•
Input for RTD, TC, V, mA		•	
4-20 mA transmitter input incl. 24 VDC supply		•	
All sensor-under test inputs scalable to temperature		•	
Automatic switch test (open, close and hysteresis)		•	
OPTIONAL functionality by choosing Optional PTC Firmware Package - U1			
Download of calibration work orders from PC		•	
Upload of calibration results (as found & as left)		•	
Engineering units visible in display		•	
Additional sensor-under-test input types		•	

Order number	Description
	Base model number
PTC155	PTC-155 Series, -25 to 155°C (-22 to 311°F)
PTC350	PTC-350 Series, 33 to 350°C (91 to 662°F)
PTC660	PTC-660 Series, 33 to 660°C (91 to 1220°F)
	Model version
A	Basic model, without input
B	Full model, incl. Reference sensor input, Sensor-under-test input
C	Middle model, incl. Reference sensor input
	Power supply (US deliveries 60 Hz only)
115	115VAC
230	230VAC
	Mains power cable
A	European, 230V
B	USA/Canada, 115V
C	UK, 240V
D	South Africa, 220V
E	Italy, 220V
F	Australia, 240V
G	Denmark, 230V
H	Switzerland, 220V
I	Israel, 230V
	Insert type and size
NON	No insert selected (standard)
UNX	1 x Undrilled Insert (Please see Insert selection for code)
XXX	1 x Single hole insert (Please see Insert selection for code)
MXX	1 x Multi hole insert (Please see Insert selection for code)
SIX	Set of 3 Imperial multi hole inserts. Covering holes from 1/8" to 1/2"
SMX	Set of 4 Metric multi hole inserts. Covering holes from 3mm to 12mm
SIM	Set of 9 Imperial inserts. Covering holes from 1/8" to 5/8" / for PTC-660 set of 8 inserts only up to 9/16"
SMM	Set of 13 Metric inserts. Covering holes from 3mm to 15mm
	User Interface Functionality (optional)
U1	Workorders, Complete Sensor-under-Test types, ect.
	STS Reference sensor (B & C models only, optional)
R1	STS-102 Ref. sensor. Dia. 4mm. Length 30mm (STS102A030EH)
R11	STS-150 Ref. sensor. Dia. 4mm. Length 180mm. For PTC-155 only (STS150A915EH)
R12	STS-150 Ref. sensor. Dia. 4mm. Length 165mm. For PTC-350 only (STS150A935EH)
R13	STS-150 Ref. sensor. Dia. 4mm. Length 203mm. For PTC-660 only (STS150A966EH)
	Calibration Certificate
F	Traceable Callibration Certificate. (standard)
H	Accredited Calibration Certificate
EA	Full EURAMET Accredited Calibration Certificate
FS	Traceable System Calibration Certificate (B & C model only)
HS	Accredited System Calibration Certificate (B & C model only)
EAS	Full EURAMET Accredited System Calibration Certificate (B & C model only)
	Accessories
CX	Protective Carrying case
CT	Solid Protective Carrying case with trolley
SR	Support rod set
CR	Protective Carrying case with Support rod set
TR	Solid Protective Carrying case with trolley & Support rod set
PTC155 B 230 A SMX U1 R11 EA CT	**Sample order number** PTC-155 B with 230VAC, EU power cord, set of metric inserts, workorders, STS-150 ref. sensor, full EA temp. calibration certificate, and carrying case with trolley.

Reference sensors to the PTC series of calibrators

Temperature ranges
For PTC-155: STS-102A030EH ....-45 to 155 °C
For PTC-155: STS-150A915EH ....-25 to 155 °C
For PTC-350: STS-150A935EH .... 0 to 350 °C
For PTC-660: STS-150A966EH .... 0 to 660 °C

Diameter and length
STS-102A030EH .... 4 x   30 mm
STS-150A915EH ....4 x 180 mm
STS-150A935EH ....4 x 165 mm
STS-150A966EH ....4 x 203 mm

Calibration points
STS-102A030EH .... -45, -20, 0, 50, 100, 155 °C
STS-150A915EH ....-25, -18, -12, 0, 50, 100, 155 °C
STS-150A935EH .... 0, 100, 200, 275, 350 °C
STS-150A966EH .... 0, 100, 250, 400, 660 °C

Certificate
Certificate..Standard: Accredited

Plug with memory
Holding information as:
1. Measuring range
2. Ro value
3. Sensor coefficients
4. Calibration date
5. Serial no.
