

PTCt-155

Professional Temperature Calibrator

-30 to 155 °C / -22 to 311 °F

The PTCt-155 is shown with option RG

Professional temperature calibration from -30 to 155 °C (-22 to 311 °F)
Reliable performance for laboratory and field calibration of temperature sensors.

Product overview

The PTCt Series builds on the proven PTC platform and introduces an updated user interface, enhanced calibration functionality, and extended connectivity, while maintaining the accuracy, stability, and flexibility of the original PTC design.

The PTCt-155 is a dry-block temperature calibrator designed for calibration tasks in the medium temperature range. It provides a stable and repeatable temperature source for testing and calibration of temperature sensors, including RTDs, thermocouples, transmitters, and temperature switches.

PTCt platform – value highlights

The PTCt Series introduces a set of improvements focused on practical calibration work:

- Touchscreen user interface with configurable views
- Built-in automation features such as Auto Step and switch testing
- Dual sensor-under-test capability for parallel calibration (model B)
- Graphical calibration indication (Option RG)
- Integrated connectivity with support for documentation and data transfer (Option RG)

*The PTCt-155 is shown
with option RG*

Typical applications

The PTCt-155 is designed for versatile calibration applications requiring stable and reliable temperature control across a wide operating range.

Typical applications include:

- Calibration of process temperature sensors in industrial production environments
- Verification of temperature instruments in manufacturing and general processing applications
- Calibration of transmitters and temperature switches in maintenance and service
- Calibration tasks in workshops, laboratories, and field service, including applications in food & beverage and ingredients production

The instrument supports calibration of a wide range of sensor types and configurations, consistent with the PTCt platform design.

Options & Accessories

Standard Delivery

Models A, B, and C Include:

- PTCt dry-block calibrator (user specified).
- Mains power cable (user specified).
- Traceable certificate - temperature performance.
- Tool for insertion tubes.
- USB cable.
- Set of rubber cones for insulation plugs.
- USB key containing JofraCal software package and reference manual.

Model B Instruments Also Include:

- Test cables (2 x red, 2 x black).
- Traceable certificate - input performance for reference sensor.
- Traceable certificate - input performance for sensor-under-test inputs.

Model C Instruments Also Include:

- Traceable certificate - input performance for reference sensor.
