Professional Temperature Calibrator

33 to 350 °C / 91 to 662 °F

The PTCt-125 is shown with
option RG

*Professional temperature calibration from 33 to 350 °C (91 to 662 °F)
Reliable performance for laboratory and field calibration of temperature sensors.*

Product overview

The PTCt-350 Series builds on the proven PTC platform and introduces an updated user interface, enhanced calibration functionality, and extended connectivity, while maintaining the accuracy, stability, and flexibility of the original PTC design.

The PTCt-350 is a dry-block temperature calibrator designed for calibration tasks in the medium temperature range. It provides a stable and repeatable temperature source for testing and calibration of temperature sensors, including RTDs, thermocouples, transmitters, and temperature switches.

PTCt platform – value highlights

The PTCt Series introduces a set of improvements focused on practical calibration work:

- Touchscreen user interface with configurable views
- Built-in automation features such as Auto Step and switch testing
- Dual sensor-under-test capability for parallel calibration (model B)
- Graphical calibration indication (Option RG)
- Integrated connectivity with support for documentation and data transfer (Option RG)

*The PTCt-125 is shown with
option RG*

Typical applications

The PTCt-350 is designed for industrial calibration applications requiring stable and accurate temperature control in the medium to high temperature range.

Typical applications include:

- Calibration of process temperature sensors used in autoclaves, sterilization processes, and UHT systems
- Verification of temperature uniformity in sterilizers, ovens, process chambers, and powder processing equipment
- Calibration of sensors in chemical and manufacturing processes
- Calibration of transmitters and temperature switches in maintenance and service

The PTCt-350 is well suited for applications where consistent temperature control is critical for process quality, validation, and compliance in industrial environments,

Options & Accessories

Standard Delivery

Models A, B, and C Include:

- PTCt dry-block calibrator (user specified).
- Mains power cable (user specified).
- Traceable certificate - temperature performance.
- Tool for insertion tubes.
- USB cable.
- USB key containing JofraCal software package and reference manual.

Model B Instruments Also Include:

- Test cables (2 x red, 2 x black).
- Traceable certificate - input performance for reference sensor.
- Traceable certificate - input performance for sensor-under-test inputs.

Model C Instruments Also Include:

- Traceable certificate - input performance for reference sensor.
