

Buy Fiber. Get Metal.

Purchase a CertiFiber™ Pro Optical Loss Test Set and get free accessories including our new durable **Metal LC** test cords.

With its fast test times, built-in project management, and LinkWare results, there's no more productive way to certify fiber links than our CertiFiber Pro. Take that to the next level with the addition of free test accessories, including our new durable Metal LC test cords—or a variety of other popular models. Add **GOLD**, and we'll throw in a free FiberLert™ Live Fiber Detector—the simple way to test ports, cords, and transceivers. Just purchase between April 4, 2022 and July 1, 2022.

Add **GOLD** support to any model above and get a free FiberLert™

Fluke Networks' Test Reference Cords (TRCs) ensure accurate loss measurements through the use of reference-grade connectors and fiber. TRCs with LC connectors feature our unique, rugged metal connectors, with a metal tab that's resistant to breaking, and an ergonomic design that makes them easier to insert and remove.

FiberLert™ lets you quickly check fiber activity, polarity, and connectivity. No setup or interpretation required—just place in front of the fiber end face or port and a light and tone indicate an active fiber. This pocket-sized tool tests single-mode, multimode UPC and APC patch cords and ports using a "non-contact"/ non-contaminating detector.
