## **NASHCROFT**

## **Test Gauge** Type 1082, ASME B 40.1 Grade 3A (±0.25% of span)

- Temperature-compensated movement that significantly reduces temperature error
- MicroSpan™ adjustment for ease in span calibration
- Hydraulically staked movement with Teflon-coated gears and bearings improves stability
- · Externally adjustable dial on standard model
- White aluminum dial, black numbers with polished mirror band
- High and low pressure movement stops are standard

The standard Ashcroft® test gauge case style features a solid-front aluminum case with a hinged ring.

The dial has a polished mirror band for pointer reflection to prevent parallax error and is available in  $4\frac{1}{2}$ , 6" and 81/2" dial sizes in both lower and back connection. Pointer is a balanced-friction adjustable design with red knife edge tip for easy reading. The standard test gauge is competitively priced and available from stock for most ranges, tube materials and case sizes.
