Safe Harbor Statement

This presentation contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are not statements of historical fact and thus are subject to risks, uncertainties and assumptions. Forward-looking statements are identified by words such as “expects,” “estimates,” “projects,” “anticipates,” “believes,” “could” and other similar words. All statements addressing operating performance, events or developments that Transcat, Inc. (“Transcat” or the “Company”) expects or anticipates will occur in the future, including but not limited to statements relating to anticipated revenue, profit margins, sales operations, capital expenditures, cash flows, operating income, growth strategy, segment growth, potential acquisitions, integration of acquired businesses, market position, customer preferences, outlook and changes in market conditions in the industries in which Transcat operates are forward-looking statements. Forward-looking statements should be evaluated in light of important risk factors and uncertainties. These risk factors and uncertainties are more fully described in Transcat’s Annual Report and Quarterly Reports filed with the Securities and Exchange Commission, including under the heading entitled “Risk Factors.” Should one or more of these risks or uncertainties materialize, or should any of the Company’s underlying assumptions prove incorrect, actual results may vary materially from those currently anticipated. In addition, undue reliance should not be placed on the Company’s forward-looking statements. Except as required by law, the Company disclaims any obligation to update, correct or publicly announce any revisions to any of the forward-looking statements contained in this presentation.

This presentation will discuss some non-GAAP financial measures, which the Company believes are useful in evaluating our performance. You should not consider the presentation of this additional information in isolation or as a substitute for results compared in accordance with GAAP. The Company has provided a discussion of these non-GAAP financial measures and reconciliations of comparable GAAP to non-GAAP measures in tables found in the Supplemental Information portion of this presentation.

In addition to reporting net income, a U.S. generally accepted accounting principle (“GAAP”) measure, we present Adjusted EBITDA (earnings before interest, income taxes, depreciation and amortization, and non-cash stock compensation expense), which is a non-GAAP measure. We believe Adjusted EBITDA is an important measure of our operating performance because it allows management, investors and others to evaluate and compare the performance of our core operations from period to period by removing the impact of the capital structure (interest), tangible and intangible asset base (depreciation and amortization), taxes, and stock-based compensation expense, which is not always commensurate with the reporting period in which it is included. As such, we use Adjusted EBITDA as a measure of performance when evaluating our business segments and as a basis for planning and forecasting. Adjusted EBITDA is not a measure of financial performance under GAAP and is not calculated through the application of GAAP. As such, it should not be considered as a substitute or alternative for the GAAP measure of net income and, therefore, should not be used in isolation of, but in conjunction with, the GAAP measure. Adjusted EBITDA, as presented, may produce results that vary from the GAAP measure and may not be comparable to a similarly defined non-GAAP measure used by other companies.
